

**Sloan American-Made Manual Flushometers**

Sloan offers a complete line of manual exposed flushometers made in the United States. The industry-leading offering of American-made manual flushometers features a wide range of options, including exposed and concealed flushometers with diaphragm and piston technology for water closets and urinals. Additional flushometer options include single- and dual-flush, along with top, rear, and side spud connections. Sloan’s manual flushometers — manufactured at Sloan’s Franklin Park, Ill., headquarters — are available in graphite, brushed nickel, brushed stainless, polished brass, and polished chrome special finish options. Sloan’s American-made flushometers are both compliant with and exceed current Buy American Act (BAA) requirements. Sloan’s manual flushometers complement its other BAA-compliant products, including touch-free faucets, pressure-assist water closets, hand dryers, sinks, and more. **NEW Little Giant VCMA-20 PRO Condensate Pump**

Little Giant’s VCMA-20-PRO Series condensate pump provides a high-capacity option for the automatic collection and removal of condensate when gravity drainage is not possible. Its slim footprint makes this pump the optimal choice for tight spaces.

**Sioux Chief Trench Drain Systems**

Sioux Chief now offers a complete line of trench drains for a variety of commercial applications. The heavy-duty, fiber-reinforced concrete HydroTec system features a bolt-less grate locking feature and is suitable for load classes up to F900. The lightweight, versatile FastTrack system is pre-sloped and installs quickly with no fasteners needed. Finally, the one-piece HydroBlock and HydroLine systems provide ultimate durability and unique solutions for heavy traffic areas.
