

## Specify Fan-friendly Touch-free Products

In high-traffic entertainment venues, commercial restrooms with manual faucet and flushometer handles can be breeding grounds for germs. Sensor-based restroom technology delivers touch-free activation of commercial plumbing fixtures to improve hand hygiene while also conserving water and energy. Sloan has been the solutions provider for sensor-based technology in venues across a number of notable facilities, including Wrigley Field, Mercedes-Benz Superdome, Chase Center, and the University of Notre Dame.
